

Introduction

On the motto of ‘respectfulness, creation, and working’ 「敬愛・創造・勤労」, we build up some activities which utilise local resources and we are making a fascinating school which is trusted and loved by our local community. We hold educational counselling for every student by all of the teachers twice a year, and give them guidance clearly about their school lives such as study and club activities.

Every year, in addition, we work very hard to learn about the natural environment in cooperation with the Faculty of Agriculture in Kyūshū University through a one-day class in the experimental forest and a career guidance workshop.

We receive much support for Ashoro town, like an all-expenses payment for various examinations, lunch service for free, and an overseas study tour to Canada for all of the 1st grade students.

Every year from 2013, the 1st grade students visit the sister town of Ashoro, Wetaskiwin in Alberta, Canada. Furthermore, Ashoro has founded a cram school to build up scholastic ability in the town.

Students in our school can attend and study there for free.
